

Home Center 2 software upgrade

Target: to upgrade software of Your Home Center 2 to its' newest version.

How to: upgrade Home Center 2 software.

Once connected to internet, Home Center 2 looks for software update automatically. Once new software has been found, information on new software version is displayed.

The screenshot shows the Home Center 2 web interface in a browser window. The address bar shows the IP address 192.168.1.100. The page title is "Home Center 2 Fibaro System 1.009". The navigation menu includes "Your House", "Rooms", "Devices", "Scenes", "Linked Devices", "Panels", and "Configuration". The "Configuration" page is active, showing "General Information" for the Home Center 2 device. The device's serial number is HC2-LAB3, software version is 1.009, and Z-Wave version is 3.20 L:1. A notification indicates that a new software version (1.010) is available. A "Start" button is highlighted with a red circle, and a red arrow points to it from the text "Click 'Start' to start software upgrade." on the right.
